Innoveda Chemicals

Paint Remover

Professional-grade solution for removing paint, varnish, and coatings from industrial and marine surfaces.

Made with GAMMA

PRODUCT OVERVIEW

RXSOL-18-1013-20

Excellent Paint Removal Solution

Designed for tough painted surfaces across industrial plants and marine environments. Effectively removes paint, varnish, lacquer, baked enamel, shellac, and epoxy from all metallic surfaces.

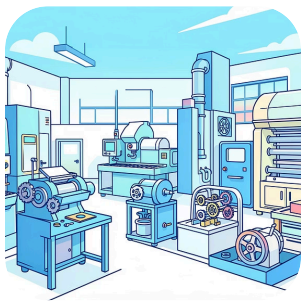
- Available in 25 Ltr and 210 Ltr packaging

Made with GAMMA

Key Applications

Marine Industry

Essential for ship maintenance and vessel surface preparation.

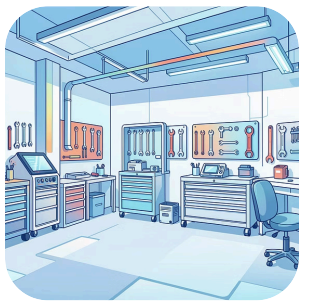


Industrial Plants

Maintains equipment and surfaces in manufacturing facilities.

Aircraft Industry

Safe for aluminum, copper, brass and their alloys.



Workshops & Garages

Perfect for automotive and mechanical repair facilities.

Made with GAMMA

Product Features

Multi-Surface Compatibility

Works on all metallic surfaces including aluminum, copper, and brass without reactivity.

Concentrated Formula

Must be applied in concentrated state for maximum effectiveness.

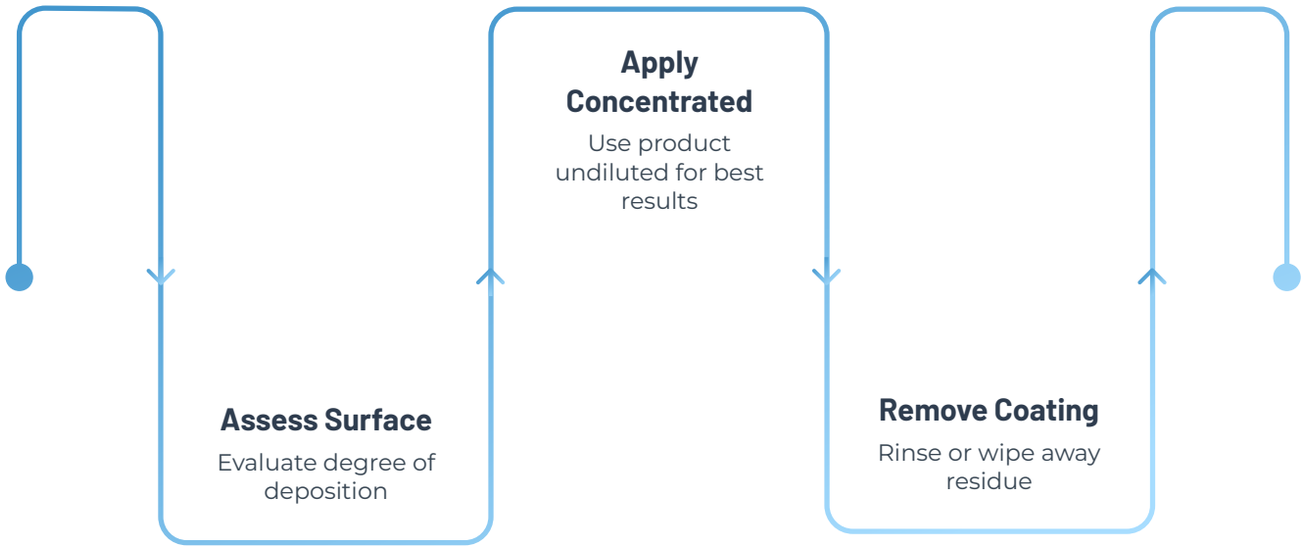
Versatile Removal

Eliminates paint, varnish, lacquer, baked enamel, shellac, and epoxy coatings.

Made with GAMMA

USAGE GUIDELINES

Application Instructions



How to Use

01

Assess Surface

Evaluate the degree of paint deposition on the surface.

02

Apply Concentrated

Use product in its concentrated state for optimal results.

03

Adjust Quantity

Vary application amount based on surface condition.

Made with GAMMA

Industry-Trusted Performance

Marine-Grade Quality

Specially formulated for demanding marine environments and shipping industry requirements.

Non-Reactive Formula

Safe for use on aluminum, copper, brass and their alloys—ideal for aircraft maintenance.

Professional Results

Trusted by industrial plants, workshops, and garages for consistent, reliable paint removal.
